- Software: Microsoft Office, Visual Studio Code, Adobe Photoshop, IntelliJ IDEA, GitHub, Vercel, Android Studio
- Content Management Systems (CMS): Word Press
- Full Stack Frameworks: MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Data Analysis and Visualization: VBA Excel Macro, Power BI

Summary

Product Test Engineer with expertise in automating tasks, data analysis, and process optimization. Skilled in leading teams, monitoring product yields, and driving improvements within the Power Amplifier division. Proficient in VBA macros and Python, with a proven track record of enhancing productivity and streamlining systems. Experienced in developing dynamic websites using PHP, HTML, CSS, and Python to create seamless user experiences and automate backend processes. Previously worked as a Software Application Developer Intern, specializing in data management, system support, and improving process efficiency.

Experience

1st April 2024 – Present

Product Test Engineer | **Inari Technology Sdn Bhd** | Bayan Lepas, Penang

Key Responsibilities and Achievements:

- Led and supervised a team of technicians in the Power Amplifier (PA) division.
- Developed and optimized VBA Excel macros and Python scripts to automate tasks and improve workflow efficiency.
- Automated repetitive tasks such as data entry, report generation, and validation, boosting productivity and accuracy within the department.
- Ensured the continuous supply of Standard Units (STD) to support production tester verification processes.
- Performed data analysis on GU batch performance to identify trends and evaluate results.
- Monitored yield rates for both pre- and post-testing stages of products in the Power Amplifier (PA) division.
- Worked closely with Broadcom's (BRCM) Wireless Semiconductor Division (WSD) to validate and approve new testers, ensuring their readiness before launching new products into production.

2nd January 2024 – 29th March 2024

Software Application Developer Intern | **Robert Bosch Malaysia** | Bayan Lepas, Penang

Key Responsibilities and Achievements:

- Developed, maintained, and optimized VBA Excel macros to enhance data analysis processes and automate tasks for improved productivity.
- Study, understand, and manage the ECN Management System, ensuring seamless operation and efficiency in workflow. Provide support in system deployment in production.

Interests

Playing Games, Learning New Skills, Listening to Music, Travelling

- Managed Power BI workspaces, controlled access permissions, and scheduled automated data refreshes.
- Spearheaded the maintenance of the E-Sample Update System and AOI Program Update System, streamlining communication processes within the organization. Prepare the system documentation for the E-Sample Update System and AOI Program Update System.

Education Background

3 + 0 Bachelor of Science with Honours in Computing
April 2022 – March 2024
INTI International College Penang
In collaboration with ***Coventry University***, ***UK***
Classification: Upper Second Class (Hons)

Diploma in Information Technology
April 2020 – March 2022
INTI International College Penang

Projects

Ride Ease – Car Rental Web-based System (2023)
Bachelor's Degree Final Year Project. This project specializes in renting cars to customers, an online system through which customers can view available cars, register, view profiles, and book cars.

Budget Buddy – Expenses Tracker App (2023)
6002CEM Mobile App Development module. The project allows users to record income and expenses, view transaction history, and analyze spending patterns.

Studio C Hair & Beauty Salon (2022)
A second-year mini project of the 5010CEM Enterprise Project module. The project focuses on developing a hair salon website that can handle customer inquiries and reviews, order processing, stock control, and marketing.

Nick's Car Wash (2022)
5007CEM Web Development module. The project is focused on developing a car wash website using HTML, CSS, PHP, and JavaScript.
